

Flexible, expandable, adaptable, and rapidly deployable

# Critical Care Response Teams

Access to healthcare resources and treatment centers that help ease the burden of staff struggling to meet the demands of COVID-19.

## Reduce Hospital Demand

Our infusion facilities are capable of accommodating 20-40 patients simultaneously, providing 80-160 openings per day, 7 days a week, and may be expanded or reduced quickly.

## Relieve overburdened hospitals & communities

Alternate Care Sites provide relief to healthcare systems and are capable of admitting and treating low, moderate and intermediate acuity patients suffering from COVID-19.

## Full Range of Medical Services

We offer a wide range of services to aid in prevention, diagnosis, and treatment of COVID as well as other pre-existing conditions.

## Multi-disciplinary Specialists

Access to professionals: physicians, respiratory therapists, pharmacists, lab, and acute care nursing staff who have served patients in multiple cities saving hundreds of lives.

## Monoclonal Antibody Infusion Therapy

The antibody infusion treatment can be completed in approximately three hours. It's most effective when given to patients within 10 days of testing positive for COVID. Our medical professionals have advanced qualifications, training, and experience, making us the premier choice to deliver this innovative, life-saving therapy. The Critical Care Response Teams stand ready to:

- Rapidly deploy and establish fully staffed infusion operation sites
- Provide medical personnel trained in state-of-the-art, evidence-based care for COVID patients and FDA-compliant guidelines for the delivery of Monoclonal Antibody Therapy treatments
- Deploy medical professionals with frontline COVID experience and familiarity with "hot zone" safety protocols to keep patients and staff safe
- Establish short-notice facilities that can expand or contract as needed

## ADVANCED QUALIFICATIONS, TRAINING & EXPERIENCE
