

Creating Stability For Those In Need

In response to the humanitarian crisis created by conflict and instability around the world, Acuity offers humanitarian assistance, to save lives, alleviate human suffering, and maintain human dignity, by helping people in need become more self-reliant.

We provide primary healthcare, specialized first aid, triage, resuscitation, and stabilization. For those who are displaced and located in refugee camps and/or facilities, we offer routine sick calls and the management of minor sick and injured persons. Acuity also provides base operations support with security, shelter, meals, water, sanitation, and logistics support.

Our team provides critical medical and humanitarian services in austere and challenging environments. With more than four (4) decades of experience providing a broad range of services to numerous Government Agencies and the North Atlantic Treaty Organization (NATO), Acuity customizes comprehensive onsite solutions to meet mission requirements and address sensitive cultural needs. Managing similar programs, we have provided operations support, accountability and refugee resettlement to asylum seekers, unaccompanied children, and young adults.

Whether it's providing compassionate care or rapidly responding to disasters, the Acuity team delivers high-quality, cost-effective care tailored to meet mission requirements.
